OVERVIEW

A club contains Companies and each company has members attached to it.
Create an application that will display the list of companies and list of members in the club.

GOALS:

1. Fetch a list of company and members
2. Items must contain:
   a. Company
   b. Member

3. Each list should appear in a separate view .

Members LIST:

1. List must support the ability to sort by age/name and both with ascending, descending.
2. Search by member name

Company LIST:

1. User should be able to sort company list based on Name ascending, descending.
2. Search by Company name

Layout should be user friendly and following Android design guides.

For Android – please use Kotlin.

Send zipped files and .apk location to janerica.yabut@viseo.com
